#### SPS Turnover Status

1. On 8 Nov 79 the Turnover Certification Document (TCD) for the Simplified Processing Station (SPS) was signed by ADCOM/XPD and the Space Division/YG. This cleared the way for the SPS to move to its "permanent" location. The move occurred on 9 May 79.

2. Following the move, the system will undergo a "soak" period to demonstrate that the move itself did not degrade system performance. Transfer to ADCOM will be automatically effective when this demonstration is completed.

61 will remain functionally responsive to ADCOM until the system is deemed fully mission capable. When this occurs, the system will be transferred to SAC. A target date for this action is 31 Mar 80.

4. This Staff Summary is provided for information only.

ORIGINAL SIGNED

WILLIAM E. LINDEMAN, BRACER, USAF  
DCS/Plans and Programs, ADCOM
